SALES VEGETABLE, MELON, POTATO FARMS

**\$3,143,000**

SALES FROM 2007

**66,845**  
ACRES HARVESTED

# Agriculture as Economic Development

Agriculture is one of North Carolina's top industries, bringing more than \$84 billion into the state's economy each year – that is 17% of the state's income! Over 16% of the state's workforce is employed in the agribusiness sector, and the state ranks 8th in the nation for agricultural cash receipts.<sup>1</sup> NC farms and agribusinesses are meeting the demand for food and food products by producing over 80 different commodities.<sup>2</sup>

This Local Food and Farms factsheet is designed for economic developers, planners, local food advocates, and community members to understand their geography's place in the multibillion-dollar NC agricultural industry. The economic indicators provided here can help local governments as they design ways to support agricultural businesses as key components of vibrant and resilient local economies.

Each region in North Carolina presents a unique set of opportunities for sustainable economic growth and entrepreneurship. Consider one example: When school systems purchase food from local farmers, students benefit from access to healthy fresh produce, farmers benefit from sales into local schools, and the community benefits because these local sales are spent at other local businesses. This type of local business opportunity keeps farms in production, maintaining North Carolina's agricultural asset base both in terms of land and farming know-how. And it keeps dollars spent on food circulating among other local businesses.

---

## As decision makers consider policies, programs and practices to support the agricultural sector there are numerous examples and supporting reports providing guidance:
