2020 Novel Tall Fescue Renovation Workshop

8:30—4:30 Thursday, March 12, 2020

St. Luke's Lutheran Church

11020 NC Hwy. 801, Mt. Ulla, NC 28125

Toxic tall fescue reduces livestock weight gains and lowers reproductive performance. This one day workshop will give you the tools and information needed to remove toxic tall fescue and replace it with novel tall fescue varieties. Speakers include local producers, company representatives and extension specialists and researchers from across the country.

Topics include:

- Fescue toxicosis
- Economics
- Testing
- Establishment
- Management
- Products
- Incentives

All 2020 Workshops:

Middleburg, VA	March 10
Mt. Ulla, NC	March 12
Watkinsville, GA	March 16
Spring Hill, TN	March 18
Lexington, KY	March 19
Harrison, AR	March 24
Mt. Vernon, MO	March 25

For more info, visit <https://cefs.ncsu.edu/extension-and-outreach/amazing-grazing/> or www.grasslandrenewal.org

Alliance Partners and Contributors includes university extension and research, seed companies and agribusiness, non-profit organizations and government institutions and forage and livestock producers.
