

NC GROWING TOGETHER

*Connecting Local Foods
to Mainstream Markets*

The North Carolina Local Food Supply Chain Inventory

The [North Carolina Growing Together](#) project, in collaboration with NC Cooperative Extension's Local Foods Flagship Program, has created a mapped inventory of businesses that serve as intermediary steps in local food supply chains. This includes value-added processors, fresh produce wholesaler/distributors, multi-farm CSA's, food hubs, community kitchens, incubator farms, and cold storage locations. The inventory does *not* include information on end retailers (e.g., restaurants, groceries, etc. selling local foods to consumers).

The NC Local Food Infrastructure Inventory is supported by the NC Growing Together project, a CEFS-led project funded by USDA (National Institute of Food and Agriculture, grant #2013-68004-20363) to scale-up local food supply chains, and by the Blue Cross Blue Shield of NC Foundation as part of a statewide food system assessment and action planning process. This USDA grant and the NC Growing Together Project will formally end in 2018, and the project will be archived at www.cefs.ncsu.edu. The [Piedmont Triad Regional Council](#) will continue to host and update the local food map and can be contacted with questions and comments at mford@ptrc.org or (336) 904-0300. For information on the initial creation of the infrastructure map and on the NC Growing Together Project, contact the Project Director, Rebecca Dunning, at rebecca_dunning@ncsu.edu or (919) 389-2220.

Local Foods Infrastructure Inventory

- Farmers Market
- Cold Storage
- Food Hub (Aggregation)
- Commercial Kitchen/Co-packer
- Dairy Processing/Cheeses
- Fruit & Vegetable Processing
- Fruit & Vegetable Wholesale/Distribution
- Incubator Farm
- Meat Processing
- Multi-Farm CSA (Community Supported Agriculture)
- Seafood Processing or Wholesale/Distribution
